DETAILED ACTION

Terminal Disclaimer

The terminal disclaimer filed on February 7, 2008 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 7,159,865 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: change the **TITLE** of the invention to "GAMING APPARATUS INCLUDING A VARIABLE DISPLAY, A BACKLIGHT, A REFLECTING COVER TO DIRECTLY ILLUMINATE GAME SYMBOLS, AND A CONTROLLER TO CONTROL THE VARYING OF THE VARIABLE DISPLAY"

Reasons for Allowance

Claims 1-7 & 10-12 are allowed.

The following is an Examiner's statement of reasons for allowance: A thorough search of the prior art fails to disclose any reference or references, which taken alone or in combination, fairly teach or suggest, in combination with the other limitations, a reflecting cover set in the end portion of the front side display unit and configured to allow light emitted from the backlight to directly illuminate symbols, the reflecting cover including one end connected to a bottom of the front side display unit and an unconnected free end".

There are numerous prior art references that generally teach a front side display disposed in front of a variable display, where the front side display is used for displaying images thereon and further superimposing images around or on top of variable display images. Such that the combination of these two displays creates a layered electro-mechanical game display. However, none of the references of record (mainly Loose & Takemoto et al. as applied in the last office action) disclose the reflecting cover in such a structural way that one end is connected to the front side display while the other end is unconnected and free. The drawings depict a U-shaped element that reflects light emitted from the backlight directly to the variable display. This specific mechanical element of the reflecting cover is absent from the prior art of record and any prior art searched. An updated search did not locate any relevant references directed to a reflecting cover of this type.

Further, the approved terminal disclaimer disclaims any portion of time beyond that of U.S. Patent No. 7,159,865. U.S. Patent No. 7,159,865 to the same inventor claims similar subject matter of the reflecting cover and a review of that application discloses reasons for allowance commensurate with the reasons above. Therefore, claims 1-7 & 10-12 are allowed.
